Perhaps you have wondered just how our auction sales of coins really work. If you have, this is what happens.

A large collection or a group of small collections are consigned by their owners to be sold at the best prices possible. We then assemble the coins in a reasonable order, making lots of one or more coins, as we determine the buyer will prefer. We then describe and catalog the lots, valuing them on a sensible basis, have picture plates made for some of the outstanding pieces, then have nearly 6000 catalogs printed and mailed to prospective buyers. Each catalog has a BID SHEET for the buyer to use along with a return envelope.

When the BID SHEETS are received they are numbered in the order of their receipt and the bids posted in a master BID BOOK. At the close of the sale, the BID BOOK is checked and the high bidder is awarded the lot at a normal advance over the second high bidder.

We do not take the entire bid if it is not necessary.

If the sale is a PUBLIC SALE, the master BID BOOK bids against the floor bidders present in the auction room on the sale date.

If the sale is a MAIL SALE, we usually close it on Friday. The following Monday after the final bids have been checked into the BID BOOK, the high bids marked and the lots awarded, we start the slow and laborious process of rechecking each BID SHEET and assembling the lots won. With thousands of bids on hundreds of BID SHEETS, this naturally takes time. However, we always have all lots in the mail by the second week after the sale. Naturally, if your bids came in during the last few days, you will be among the last to receive your lots.

A final word — the offering of ridiculously low bids that are only 10% to 20% of the estimate of value is a waste of time. Many dealers place a standing order for various types of material at prices from 50% to 80% or more of the estimates.

Govern yourself accordingly, and do enjoy this great hobby.
